Cordwood construction can be sustainable depending on design and process. There are two main types of Cordwood Construction, Throughwall and M-I-M (mortar-insulation-mortar). In Throughwall, the mortar mix itself contains an insulative material, usually sawdust, chopped newsprint, or paper sludge, in sometimes very high percentages by mass (80% paper sludge/20% mortar).

How To Build A Cordwood House - Off Grid Quest
Cordwood masonry is a method of log building that is NOT like standard log home construction. Instead of using long logs that run the length of the walls, this style uses short logs of a uniform length (typically from 12-24 inches, though it can be more or less) laid with the end grain facing out like this: Save.

10 FAQ's About Cordwood For Absolute Beginners ...
Wood Types For Building A Cordwood Home. Softwoods are best. Cedar has a good R-value (1.5 per inch) and is naturally decay resistant. Hardwoods have a tendency to swell and crack mortar joints. The best softwoods: white cedar, white pine, cottonwood, poplar, red cedar, spruce or larch followed by hemlock and poplar.

Cordwood Homes • Insteading
Cordwood construction is energy efficient (a 16 cordwood wall has approximately an R-value of 20), sustainable and offers an excellent alternative for those looking to build an inexpensive retreat. Every cordwood building becomes a DIY project, and much of the construction can be done without professional help. Once a cordwood wall is built, it is finished inside and out as it doesn't require additional work. Cordwood building is a money saver and it all depends on how much of the work ...

Cordwood Building - An Old-School Building Technique
Cordwood building is not a quick process, unlike traditional stud framing. Normally, you'd just slap some 2 x 6's together and add insulation and sheathing of some kind, but that's not the case here. I wish we had an army working on these walls just so it would go faster, but that isn't always practical.

Cordwood construction (also called "cordwood masonry", "cordwood building", "stackwall construction", "stovewood construction" or "stackwood construction") is a term used for a natural building method in which short logs are piled crosswise to build a wall, using mortar or cob to permanently secure them. This technique can use local materials at minimal cost.

Cordwood construction - Wikipedia
Cordwood offers the imagination a chance to play. Using a few basic building concepts of proper foundation, frame and roof, the sky is the limit in how the owner/builder fills in the blank canvas of the wall. Random patterning, special features, bottle bricks and designs are all popular ways to make your cordwood home special.
