Commodity Trading Commodity exchanges are formally recognized and regulated marketplaces where contracts are sold to traders. The seller of the contract agrees to sell and deliver a commodity at a set quantity, quality, and price at a given delivery date, while the buyer agrees to pay for this purchase.

Trading Random Length Lumber: How to Start ... - Commodity.com

Roll yield can be found simply by taking the futures price (F) dividing it by the spot price (S), taking it to the power of 1 over time (t), and taking the difference from one. Roll yield =  $1 - (F / S)^{1/t}$  The futures price of any commodity at any given time – F(t) – is determined by the following:  $F(t) = S(1 - y + c + r)^t$ . Where:
