How can I get the name and grade of steel by chemical ...

For example, the ASTM 1050 grade steel is so named because it is approximately .50% carbon by weight.

However, the tolerance for carbon percentage in the ASTM 1050 standard is .48- .55%. A similar Japanese specification

Download Free Steel Grade

sets carbon between .47-.53%, and allows for silicon and other trace elements, whereas the ASTM standard does not.
