An Engineer Combat Battalion was a designation for a battalion-strength combat engineering unit in the U.S. Army, most prevalent during World War II. They are a component of the United States Army Corps of Engineers. Also known as "Combat Engineer Battalions", they were typically divided into four companies: A, B, C, and Headquarters and Service. Best known for pontoon bridge construction and clearing hazards in amphibious landings, their duties also included serving as sappers deploying and dea

~~7th Engineer Support Battalion - Wikipedia~~

A combat engineer in many armies is a soldier specialist who performs a variety of military engineering, mining, construction and demolition tasks under combat conditions. The combat engineer's goals involve facilitating movement and support of friendly forces while impeding those of the enemy. Combat engineers build fighting positions, fortifications, logistics and roads. They conduct demolitions missions and clear minefields manually or through use of specialized vehicles. Typical combat engine
