In his later works, including *The Ecological Approach to Visual Perception* (1979), Gibson became more philosophical and criticized cognitivism in the same way he had attacked behaviorism before, arguing strongly in favor of direct perception and direct realism, as opposed to cognitivist indirect realism. He termed his new approach "ecological psychology".

James J. Gibson: The ecological approach to visual ...

The Ecological Approach to Visual Perception. This is a book about how we see: the environment around us (its surfaces, their layout, and their colors and textures); where we are in the environment; whether or not we are moving and, if we are, where we are going; what things are good for; how to do things (to thread a needle or drive an automobile); or why things look as they do.

The ecological approach to visual perception was a radically novel proposal 40 years ago, and many of the concepts it introduced are still of great relevance today. The embodied cognition programme in psychology owes a great deal to it, and the affordance-centric approach to perception is a common idea in modern robotics. Some of the main ideas in this book are [...]
