This eminently readable book focuses on the people of mathematics and draws the reader into their fascinating world. In a monumental address, given to the International Congress of Mathematicians in Paris in 1900, David Hilbert, perhaps the most respected mathematician of his time, developed a blueprint for mathematical research in the new century.

The Honors Class: Hilbert's Problems and Their Solvers ...

At the dawn of the twentieth century, David Hilbert challenged the mathematicians of the world with twenty-three problems. These problems encompassed a wide breadth of mathematics and stimulated mathematicians for decades to come. Yandell's book is a (relatively) leisurely stroll through the people and the mathematics associated with these ...

The Honors Class Hilberts Problems And Their Solvers ...

Hilbert's problems are twenty-three problems in mathematics published by German mathematician David Hilbert in 1900. They were all unsolved at the time, and several proved to be very influential for 20th-century mathematics. Hilbert presented ten of the problems at the Paris conference of the International Congress of Mathematicians, speaking on August 8 at the Sorbonne. The complete list of 23 problems was published later, most notably in English translation in 1902 by Mary Frances Winston News

The honors class: hilbert ' s problems and their solvers ...

The Honors Class is the collection of mathematicians that individually or in collaboration solved or partially solved at least one of Hilbert's 23 problems. Yandell does a great of gathering up the historical information so that we have an up-to-date account of the progress on each problem and even how some problems evolved because of their vague or incorrect original proposal.
