What have I done wrong?

python—UnicodeDecodeError: 'utf8' codec can't decode ...

Python pandas will read a csv file using utf-8 encoding defaultly. However, if the character encoding of this csv file is not utf-8, UnicodeDecodeError may occur. How to fix this error? In this example, the character encoding of csv file is cp936 (gbk).

Fix Python Pandas Read CSV File: UnicodeDecodeError: 'utf ...

The error is because there is some non-ascii character in the dictionary and it can't be encoded/decoded. One simple way to avoid this error is to encode such strings with encode () function as follows (if a is the string with non-ascii character): a.encode ('utf-8').strip () share.
